fight last year over the unconditional repeal of the purchasing clause of the Sherman law split the Democrats wider than anything that has happened since the war to the party in Congress; but from the States that are politically classed as southern only thirty-four Democrats voted for that proposition, and eighty two declined to support it. When a national victory is to be won the South has to furnish more than two thirds of the to furnish more than two thirds of the session dent into the White House. In 1892 Mr. Cleveland was elected without New York loose from the Re-Western States cut loose from the Republicans. In the opinion of the bestpublicans. In the opinion of the bestpusted politicians the action of Illinois

Indeed, it is generally leared that in the contest of 1855 the Democratic party section as relates to the filling of various and in itsu of all of paragraph 1 will have to rely on the solid South and of section 4 of said article 1, in so far as New York, New Jersey, and Indiana, and possibly Connecticut, to give them another national victory. It would be a pity should things turn out that way, and the clections in November was clear idea of what may be except fillings and Wisconsin at the residential election. it is impossible for his suggestions to be carried out. The speeches of Senators Gray and Vest on yesterday indicate that the Democratic senators have no idea of yielding either to Mr. Cleveland or to the House. Many of the members of the House are tired of the farce of holding out, and as two or three breaks would open up the whole question again, the indications are that after a lot of speechmaking is indulged in the House will simply walk into camp. Then if the President does not like the bill he can yeto it.
